

# **SHUTTLE VALVES**

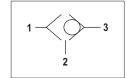

The shuttle type cartridge valves allow taking of the highest pressure signal to the external port via displacement of tempered and ground steel ball. There are usually employed to signal the actuator load to a load sensing pump pressure compensator. External steel body.

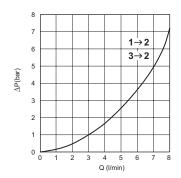

### **HYDRAULIC FEATURES**

| Max. working pressure                  | 400 bar                        |
|--|--------------------------------|
| Max. Flow                              | 8 I/min                        |
| Hydraulic fluid                        | DIN 51524 Mineral oils         |
| Fluid viscosity                        | 10 ÷ 500 mm <sup>2</sup> /s    |
| Fluid temperature                      | -25°C ÷ 75°C                   |
| Ambient temperature                    | -25°C ÷ 60°C                   |
| Max. contamin. level class with filter | ISO 4406:1999 - class 19/17/14 |
| Weight                                 | 0.006 kg                       |
| Tightening torque                      | 16 ÷ 18 Nm                     |
| Cavity (G 1/8)                         | CG001002 (See section 17)      |

### **HYDRAULIC SYMBOL**

#### **PRESSURE DROPS**

Fluid used: mineral based oil with viscosity  $46~\text{mm}^2/\text{s}$  at  $40^\circ\text{C}$ .

## **ORDERING CODE**
